

Assembly and Gear Lubricants

Team Synergy Coatings lubricants are specially formulated to provide Ultra High Anti Wear and Anti Scuff properties.

SP-308 Assembly Lubricant

- Extreme load lubricant
- Protects bearings, cam, crank, valve stems, push rod ends, lifters etc.
- THE choice for Top Fuel and Alcohol
- Suitable for all types of engines, two of four stroke, rotary, supercharged, turbo charged or normally aspirated

SP-309 Gear Lubricant

- Light weight / high pressure lubricant
- Use in drag racing applications for less friction and drag
- Excellent in Std transmissions using ATF (not for use in Automatics)
- Reduces friction and drag
- May be used in power steering units. Excellent for Circle Track and Off Road applications
