## **Products and Services for the Vintage Car Racing Industry**

### **Products:**

#### **Ceramic Based Thermal Barriers:**

**Header Coatings-** Temperatures up to 2000 F. Multiple Colors, Black, White, Red, Blue, Orange, Silver, Stainless Steel, Titanium, Cast Iron Grey, Charcoal. A clear coat material with the same temperature range can be applied to all colors for a high gloss finish.

**Piston Coatings-** for Stock, Turbo, race cars.

**Brake Parts-** to reduce temperature and wear.

#### **Dry Film Lubricants:**

Applied to internal engine parts, withstands pressures to 300,000psi, provides increased lubrication, and aids in oil shedding, reduces friction, galling and wear of Crankshaft, Bearing's, Gear's, Rocker Arms, Sides of Pistons, Valve Springs, and Valve Train Components.

#### **Thermal Dispersants:**

Rapidly disperses heat away from Oil Pans, Engine Blocks, Heads, Radiators, Wheels and Brake Parts.

#### **Insulation Coatings:**

Spray on coatings to reduce temperature inside the Drivers Compartment, used as a heat shield on Firewalls, Floor Pans, Door Panels, and Roofs. Also is a Sound Reduction Coating, can be painted over, with stands temperatures to 600 F. Can be used to coat underneath fenders to minimize "Staring" of fender paint from rocks or debris on highways.

#### **Heat Barriers, Applied to Non-Metal Surfaces:**

Specially formulated coating to provide a layer of insulation to isolate non-metal components from high temperature exposure. Excellent adhesion to most "thermal set" polymers ,will increase the component temperature rating 200+degrees,non-

metal parts used to save weight often are located in a engine compartment then exposed to temperatures above the part rating, soften or collapse .Rated to 600 F

### **Specially Formulated Lubricants:**

Formulated with extreme load lubricants to provide ultra high anti wear and anti scuff properties, increases Lubricity, reduces friction and drag.

Assembly Lubricant

Gear Lubricant

Oil Additive

### **Suspension Systems; NEW**

Our Patent Pending VRFSS™ suspension system designed to stabilize vintage automobiles for a better ride on bumpy or wet roads improves handling and cornering, fully adjustable shocks comes as complete kit bolt on construction.

### **Flooring Systems: NEW**

Premium 100 % Epoxy solids 2 part for indoor applications, 1- gallon covers 200-225 ft, sq. available in 2 colors light grey or dark grey, other colors on special order. Impervious to Oils, Hydraulic Fluids, Break Fluid, Engine Degreasers, No tire marks.

Premium 2 part Clear Urethane floor coating, for outdoor use and as a top coat for the Epoxy coating.

Floor Sealer

### **Car Care Products:**

Engineered Polish now with Nano Technology for cleaning and polishing all metals, fast drying, long lasting imparts a brilliant mirror-like shine, available in Regular or Heavy Duty formulas

Paint Finish Restorer and Protectant, cleans and seals automotive paint, gelcoat, helmets

Leather and Vinyl Conditioner (**Reformulated**) revives faded seats and dashboards

“Wonder Cloth” Streak Free Rag, never use chemicals again to clean Glass. Cleans with just water, Bug’s, Film, Grease, Soap Scum, and much more. Lasts up to 5 years, occasionally machine wash.

Head-lite Restoration Kit, in 10 min. returns faded and yellowed plastic lamp lens to the original clear color for better night time driving.

Tire Dressing **NEW, packaged in 8 oz bottles with spray head.**

Window Treatment **NEW, for inside and outside anti-fog, anti rain, treat only 2 times a year, packaged in 2 oz bottles, a little goes a long way.**

## **Personal Care Products:**

**Hand Cream, heals and re-hydrates rough, split skin for the wrench that spends all day working with detergents, grease and solvents.**

**Skin Cream plus UV/UVB protection to SPF 15 for the driver or navigator racing in open cars.**

**Deep Relief creams Aloe based Topical Preparation Gel, “Cool” or “Warm”; helps relieve cramps in hands and feet packaged in 2 oz tubes or 6 oz dispensing bottles.**

## **Services:**

**Factory Trained, Licensed Application Shops are located in regions in North America, Europe, S.E Asia and Australia.**

**Each Licensed Shop is equipped with Proprietary application equipment uses techniques and application processes furnished by Team Synergy Coatings.**

**To find the location of a shop closest to your community please log onto [www.coat-this.com](http://www.coat-this.com). Or e-mail us at [synergycoatings@msn.com](mailto:synergycoatings@msn.com). Global Based Licensed Shops, insures uncompromised quality from region to region.**
